Raul Ardelean

Computer Science Student

raulardelean10@gmail.com GitHub LinkedIn

Cluj-Napoca, Romania

Profile

B.Sc. Computer Science student at Babeș-Bolyai University with a strong focus on C/C++, algorithms, data structures, and performance-oriented software. Experienced in problem setting, test generation, and scientific committee work for informatics contests, with interests in software engineering and low-latency systems.

Education

Babeș-Bolyai University, Faculty of Mathematics and Computer Science *2025 – Present*
B.Sc. in Computer Science Cluj-Napoca, Romania

National College "Vasile Lucaciu" *Graduated 2025*
Mathematics and Computer Science Baia Mare, Romania

Experience

Game Development Intern (Erasmus+ Mobility) *Mar 2024*
Lisbon, Portugal
Jelly Code

- Completed an Erasmus+ vocational training mobility placement involving hands-on activities in introductory game development.
- Applied object-oriented programming concepts while working with interface elements, graphics and sound components, application export methods, Microsoft Visual Studio, and the Unity environment in an international, team-based setting.

Competitive Programming & Achievements

- Honourable Mention at **Romanian Collegiate Programming Contest (RCPC)**.
- Two-time qualifier and participant in the **Romanian National Olympiad in Informatics**.
- National-stage qualifier in the **Applied Informatics Olympiad AcadNet** (Software Interoperability).
- Honourable Mention at the **Grigore Moisil National Informatics Contest**.
- Ranked **11th in Cluj-Napoca** and **61st globally** in the **41st Classic Cloudflight Coding Contest (CCC)**.

Scientific Committees

- Member of the scientific committee for the **Romanian National Olympiad in Informatics**.
- Member of the scientific committee for **International Informatics Olympiads in Teams (IIOT)**.
- Member of the scientific committee for the **Grigore Moisil National Informatics Contest**.

Volunteering

Volunteer, ZborHub *Jun 2025 – Present*
Baia Mare, Romania

Contributed to non-formal educational and community initiatives, including event coordination, hub support, and onboarding of new members.

Skills

Programming: C, C++, Python, PHP, SQL
Computer Science: Algorithms, Data Structures, Complexity Analysis, Graph Theory, Dynamic Programming, Combinatorics, Object-Oriented Programming
Tools: Git, GitHub, Microsoft Visual Studio, VS Code, CLion
Additional: Competitive Programming, Problem Solving, Problem Setting, Contest Organization, Teamwork
